

MELBOURNE WATER CORPORATION
CASEY CITY COUNCIL
0705 LYNDHURST NORTH MAIN DRAINAGE SCHEME
SECTION 76

Notes
GENERAL
1. All levels are in metres to Australian Height Datum (AHD).
2. Co-ordinates for setting out are to Map Grid of Australia (MGA).
3. All works to be carried out in accordance with Melbourne Water Specifications and Standard Drawings, except where varied by these notes.
4. All pipes to be U/R Class 2 unless indicated otherwise.
5. Manhole covers and gratings must match finished surface levels.
6. Where works are in the vicinity of existing services, these services are to be located and the various authorities notified (see Table) prior to the commencement of the works.
7. Hazardous services are located in close proximity to works including overhead electrical cables and telecommunication cables.
Emergency contacts:
SERVICE CONTACT TELEPHONE
Electricity 9238 6481
Telecommunications 1800 653 935
8. All connections must be carried out in accordance with Melbourne Water's manual, 'Work Procedures for Confined Space Entry'. Such work may only be carried out by persons possessing current mandatory qualifications required for persons who are to be engaged in confined space entry.

DESIGN
8. Melbourne Water N25 Grade Concrete - General Purpose (GP) type cement must be used in construction of all structures.
9. Reinforcing Steel must be Structural Grade Y (Hot Rolled Deformed Bars) in accordance with AS1302.
10. The contractor must:
a. supply all materials for the connection of the proposed stormwater a) drain to the existing stormwater system.
b. strip and stockpile existing topsoil for later site restoration.
c. remove all surplus spoil from site.
d. give the Superintendent at least 7 clear days notice prior to the commencement of the works.
11. All pit risers to be on left side, looking upstream, unless indicated otherwise. Pit risers to also be on kerb side where appropriate.

STRUCTURAL
12. Clear cover to reinforcement must be 50mm minimum.
13. Minimum lap length must be 400mm.
14. All exposed steel components must be hot dipped galvanised after fabrication.
